Investing.com Technical Requirements

Accepted creative types in Investing.com System

- Image: A basic image creative. Requires a GIF, JPG, or PNG file + a landing page URL. The file should **not exceed 140KB**.
- DoubleClick tag: A creative hosted by DoubleClick. Provide a URL rather than a snippet for the creative.
- Third Party Tag: A highly customizable, interactive creative. You can use any custom HTML and JavaScript snippets as well as tags from a third-party ad server or DoubleClick for Advertisers.
 - **Must be https** – http-embedded tags cannot be viewed on any Investing.com domain.
 - For this option, make sure the code include **Click Macros**
 - The tags should also contain backup static images in the creative pool.

clickTAG implementation

- Insert the clickTAG in the .fla file before converting it to the .swf file that is uploaded in DFP.
- The clickTAG variable is properly implemented in the action of the button. In the getURL()function of the action, make sure to specify the clickthrough URL as clickTAG and the target window as "_blank".
- Example 1 : `getURL(clickTAG,"_blank");`.

A more detailed documentation for clickTAG implementations can be reviewed in the below link:

www.adobe.com/resources/richmedia/tracking/designers_guide.
